Runa

The Runa API

Upgrade to the Runa API to unlock new countries, enhanced features and greater reliability as you scale.

Integrate to the Runa API to optimize your payouts

Don't let your current Connect API hold you back. The improved Runa API unlocks the power of the market's most comprehensive payouts platform.

Built with your needs in mind, the Runa API delivers new country support, innovative features, simplified processes and the improved reliability you've been asking for.

New features and service improvements will be added to the Runa API only.

Unlock new countries and currencies

Access all merchants in new currencies and countries including India, China and Brazil so you can reach your global audiences seamlessly.

Scale your payouts with confidence

The Runa API boasts unmatched reliability with 99.99% uptime, faster response times, zero daily timeouts, and robust security features.

Optimize your processes and payouts

Send 350+ payouts simultaneously and deliver them in under 1 second. Optimize your workflows and expedite payouts for a seamless user experience.

Secure your service continuity: Migrate to the Runa API now

The Connect API will be deprecated on September 12th, 2024. To ensure service continues to run smoothly, it is essential that you switch to the Runa API.

Start your migration today for a seamless transition and continued success.

RUNA API VS CONNECT API

What's changing?

Unlock immediate improvements for you and your tech teams through the Runa API.

Start your integration today

- Simply email migration@runa.io to tell us you are ready to begin.
- Integration times vary but take approximately 12 hours.
- Visit the Runa Developer Hub and watch this step by step video guide.

Your integration to the Runa API will be an easy, one time integration so you don't need to make any significant development changes in the future.

Runa

"Setting up the Runa API migration was a seamless experience thanks to our Account Manager. Their swift and clear communication made the process effortless, providing us with all the necessary information for a smooth transition. The actual process was very simple, and the documentation was helpful in setting up the new authentication procedure."
